

SERGII MAVROV

Principal Software Engineer | Architect | AI Enthusiast 📍 Germany | 

serg.mavrov@gmail.com |  linkedin.com/in/smavrov

PROFESSIONAL SUMMARY

Experienced Software Engineer with a strong architectural background, working with modern JVM technologies (Java 11–21, Kotlin), Spring Boot, and cloud-native microservices. I design and implement scalable distributed systems, contribute to architecture evolution, and drive modernization initiatives across industries including logistics, gaming, and construction. My focus includes clean architecture, system reliability, and mentoring engineers in agile teams. As an AI enthusiast, I specialize in Agentic AI, RAG, and intelligent automation to enhance system scalability.

TECHNICAL SKILLS

- **Core & Backend:** Java 11-21, Kotlin, Spring Boot, Spring Framework, Microservices, REST, SOAP, GraphQL.
- **Cloud & DevOps:** AWS, Kubernetes, Docker, Jenkins, Maven, Gradle, CI/CD pipelines.
- **Data & Streaming:** Kafka, Elasticsearch, PostgreSQL, MongoDB, MySQL, Redis, Hibernate/JPA.
- **AI & Innovation:** Retrieval-Augmented Generation (RAG), Agentic AI (LangChain, LangGraph), Vector Databases, Python.
- **Architecture:** Clean Code, Domain-Driven Design (DDD), Event-Driven Architecture, Solution Architecture, High Availability.

PROFESSIONAL EXPERIENCE

Principal Software Engineer | *adesso SE Mar 2025 – Present | Hybrid*

- Positioned as a key technical expert working with Kubernetes, Microservices, and Java within agile methodologies.

Senior Software Engineer (Contract) | *Hapag-Lloyd AG Apr 2025 – Dec 2025 | Hamburg, Germany (Remote)*

- **Project:** Freight Information System (FIS) — the digital backbone of Hapag-Lloyd's global logistics, managing bookings and transport planning.
- **Achievements:**
 - Successfully drove the transition toward a microservice-based architecture, decomposing legacy components and defining service boundaries.
 - Led the implementation of cloud-native principles using Java 17, AWS, and Kubernetes to ensure system scalability and resilience.
 - Integrated AI and automation to improve decision-making processes and operational efficiency.
 - Optimized CI/CD pipelines and infrastructure automation, ensuring "High Availability" for critical business processes.

Senior Software Engineer | *Tipico Jan 2024 – Mar 2025 | Munich Area*

- **Project:** License Manager. Owned system performance and runtime stability for high-load critical execution paths.
- **Achievements:**
 - Led architectural modernization of core components to align with regulatory requirements.
 - Acted as Technical Lead, driving engineering standards and long-term technical strategy.
 - Utilized Java 21, Spring Boot, Kafka, and Kubernetes to deliver major release cycles.

Senior Software Development Engineer | Hilti Deutschland Jan 2021 – Dec 2023 | Munich

• **Projects:** Hilti On!Track (Asset Management), Hilti On!Work (Resource Management), and Task Force (Performance Optimization).

• **Achievements:**

- Key member of a "Task Force" solving complex technical issues globally.
- Optimized migration processes, accelerating performance by more than 40% through configuration and code improvements.
- Developed new features using Java 11-17, Kotlin, Microservices, and GraphQL.

Senior Java Developer | Amadeus Apr 2014 – Dec 2020 | Aachen

• **Projects:** Central Configuration Database & Dynamix Config Packaging Tool.

• **Achievements:**

- Designed and implemented high-load applications for global travel distribution systems.
- Managed full-cycle development from requirements analysis to performance stress testing and DevOps configuration.
- Tech stack: J2EE, Spring Boot, Microservices, Docker, Kubernetes, MongoDB.

(Prior experience includes roles at GlobalLogic, Ciklum, HP/Lohika, and others)

EDUCATION & CERTIFICATIONS

Universitatea de Stat din Tiraspol *Licentiate in Mathematics & Computer Science (1997 – 2002)*

Key Certifications (2024–2026):

- **AI & RAG:** IBM RAG and Agentic AI Specialization, Advanced RAG with Vector Databases (IBM), Building AI Agents and Agentic Workflows (Coursera/IBM).
- **Security:** Google Cybersecurity Certifications (Assets, Threats, Networks, Detection and Response).
- **Architecture & Cloud:** Enterprise Architecture in Practice (LinkedIn), Kubernetes in AWS (Coursera), Learning Kubernetes.
- **Development:** Top Features Java 21, Elasticsearch in Depth, Angular Development Specialization.
